GEARWRENCH Ups Ratchet Game with New 90-Tooth Line

Standard and Flex Head options engineered with smarter, stronger design

Sparks, Md.—GEARWRENCH® is proud to roll out its new line of 90-tooth ratchets to start 2020, bolstering one of its signature product categories in the process. Unveiled at the SEMA Show this past November, the 90-tooth ratchet line is stronger and provides better access, all while being more comfortable on the hands of professional mechanics who turn them countless times a day.

“Our growing industrial design team has had a massive impact on our products in recent years, and the 90-tooth ratchet line is a great example of that,” said Jim Stewart, product manager. “The goal is to always be improving—to never settle for good enough. So, we went and made these ratchets sleeker, with more teeth and greater comfort than ever before, improving them in every way possible.”

With 90 teeth, the new line of ratchets provides a 4-degree swing arc for greater access in tight spaces. The precision-engineered, high-strength pawl gives increased durability, helping the ratchets exceed ASME torque performance requirements. For those who prefer a chrome handle, the full polish versions are easy to clean and ergonomic to be easier on the hands. For those who prefer it, the solvent-resistant cushion grip is comfortable but tough enough to handle shop life.

Available now are 13 individual standard and Flex Head ratchets to go with six sets. Seven are full polished chrome and six will feature the cushion grip, and all except the $\frac{3}{8}$ -inch stubby flex head ratchet are available in $\frac{1}{4}$ -inch, $\frac{3}{8}$ -inch and $\frac{1}{2}$ -inch drives.

Product samples are available upon request. For more information, visit www.gearwrench.com.

About GEARWRENCH®

GEARWRENCH is a premier hand tool brand from Apex Tool Group. Since the launch of the original five-degree ratcheting wrench, the GEARWRENCH brand has led the industry with breakthroughs in pass-thru ratchets, sockets, screw/nut drivers, pliers, and specialty tools.
